M-Futures

A unique Higher Apprenticeship
in Construction Management

Your future in construction starts here

Total People, in partnership with Manchester City Council and Manchester Life, is offering the chance to gain real work experience and work towards a professional apprenticeship.

M-Futures is an exciting chance to gain experience with construction, engineering or property companies across Manchester.

You'll work with up to six companies, get paid a wage and study towards a Higher Level 4 Apprenticeship in Construction Management.

It's a once in a lifetime opportunity to work with the city's biggest construction players and can pave the way to a life-changing career in construction management.

- 2 year programme
- Learn professional construction skills on-the-job
- Work with up to six companies on rotation
- No fees or student debt to pay
- Starts September 2019
- Gain a Level 4 NVQ in Construction and Building Services Management and a HNC qualification
- Earn a salary of £16,000+
- Build a future career with leading employers

“Through the apprenticeship, I’ve had the opportunity to experience every element of a major project. The experience I’ve gained is invaluable.”

Dylan Pritchard, Our Town Hall project Construction Management Apprentice

A Real Alternative to University:

There are no fees, no student loans or debts on an apprenticeship programme. The fees are paid by your employer and you will earn a salary, rising in line with age related and performance pay structures.

This is a unique chance to gain recognised qualifications and work experience with a range of top companies, build an impressive CV and potentially secure a permanent career with one of the companies. On completion of your apprenticeship, you can easily earn over £20k and potentially gain company sponsorship to complete a degree in your chosen pathway.

“What appealed to me most about this apprenticeship was the fact that you could explore different aspects of construction and get an insight and background knowledge in more than one section of the industry. I’m really enjoying working with

Laing O’Rourke on the Factory and I am excited to see this exciting project through.”

Amelia Stanway, Laing O’Rourke Construction Management Apprentice

You could be working with some of these companies:

What M-Futures involves

Over two years, you will work with up to six companies on rotation in a range of business areas and construction projects. Depending on the companies and projects you are placed in, you will develop a full mix of skills including:

- Building development and design
- Project Management
- Contracting
- Consultancy
- Planning
- Procurement
- Construction finishing stage and handover.

Contemporary or Heritage options

There are two pathways to the M-Futures programme you can apply to:

Contemporary - this involves working on projects that are creating modern buildings such as mixed use retail, leisure, apartment and office developments.

Heritage - this involves working on major projects that are restoring older buildings such as the re-development of the Grade 1 Listed Manchester Town Hall.
